

NOTICE OF COMMENCEMENT:

Long Point Region Conservation Authority Flood Hazard Mapping and Risk Assessment

The Project

In partnership with Norfolk County, the Long Point Region Conservation Authority (LPRCA) has initiated a project to update the Lake Erie shoreline flooding and erosion hazard mapping within Norfolk County to current mapping and technical standards. This project is being completed under the National Disaster Mitigation Program (NDMP). Consistent hazard mapping across conservation authority jurisdictions is required to support land use planning and permitting decisions in at-risk communities and flood and erosion-related response and mitigation planning. The project will also update municipal risk assessment information for shoreline flooding, including inventorying at-risk infrastructure and estimating damage potential.

The Process

The project will extend from the spring of 2019 to January 2020. Two (2) Public Information Centres (PICs) will be held during the project to provide information to homeowners on flood hazard mitigation and emergency preparedness, as well as to provide project information and allow for an opportunity for the public to contribute knowledge of local conditions. The first PIC will take place on Saturday, June 22, 2019 from 10:00 am to 1:00 pm at the St. Williams Community Centre, 80 Queen Street West, St. Williams. Additional details regarding the upcoming PIC and the project will be advertised as the study progresses (www.lprca.on.ca).

Community Engagement

There will be opportunity to provide any comments or input that you may have about this project at the PICs. This material will be maintained on file for use during the study and may be included in study documentation. Information will be collected in accordance with the Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record.

If you have questions or specific comments related to this study, please contact either of the following:
